

NEWLAB

19 Morris Ave. Brooklyn Navy Yard
Brooklyn, New York 11205

Defining the future of technology & human experience.

New Lab Is a Platform for Scaling Frontier Technologies

New Lab champions the world's most forward-thinking entrepreneurs and partners with corporate and city stakeholders to catalyze innovation. New Lab provides advanced tools, prototyping labs, capital, and leadership for entrepreneurs to concept, build, and deploy formative technologies.

New Lab Is Home to a Diverse Array of Entrepreneurs and Companies

New Lab is home to a diverse and growing community of entrepreneurs working across advanced technologies, including: AI, Robotics, Blockchain, Energy, Connected Devices, Urban Tech, AgTech, Med Tech, and more. Our resident members include roboticists building systems for NASA missions, engineers creating microscopes to explore the world at the nano level, and technologists developing wearable sensors to protect industrial workers.

New Lab Provides Workspace for 600+ Entrepreneurs

New Lab provides resources for over 600 entrepreneurs, engineers, and designers in our community. As of September 2018, New Lab is near capacity and represents a membership of over 10 companies working on-site daily.

Enterprise Companies Catalyze Innovation at New Lab

New Lab's Immersive enterprise programs empower leading corporations to innovate with the same human-centered agility as our entrepreneurial community. New Lab facilitates collaborations between corporations, entrepreneurs and cities, resulting in the advancement of technology and the enrichment of the broader community through workshops, product development sprints, and co-creation opportunities.

New Lab Is a Leader in Urban Tech

Through its New Lab City programs, New Lab is creating opportunities for entrepreneurs, universities, enterprise partners, and civic leaders to come together to address the most pressing challenges facing cities today.

New Lab's Design Is Informed by the Past's Vision of the Future

New Lab is located in Brooklyn Navy Yard Building 128, a former epicenter of American shipbuilding. Work began on Building 128 — which, after years of neglect, had become a deserted shell — in 2012. New Lab, with its advanced prototyping capabilities, returns the building to relevance. New Lab was developed and designed by Macro Sea, a firm founded by David Belt in 2009. Marvel Architects was our architect of record.
